

**AMENDMENTS TO THE SPECIFICATION WITH MARKINGS TO SHOW
CHANGES MADE**

Change the title to read: --ELECTRICAL POWER PLUG WITH SECURE POSITIONING OF THE CONTACT PRONGS--.

Amend the following paragraph:

[0015] -- According to another aspect of the invention, a method of making an electrical power plug, includes the steps of providing a carrier plate having a flexible ~~locking-member~~ detent and formed with an aperture intended for receiving a contact prong, shaping an end of the contact prong into a chamfered or rounded configuration, inserting the contact prong end of the contact prong through the aperture, thereby deforming the ~~locking-member~~ detent, whereby a movement of the contact prong through the aperture is limited by a first stop of the contact prong, and the ~~locking-member~~ detent engages behind a second stop of the contact prong.--.
